About Us

At SI FREIGHT Pvt Ltd (Spedition Group), logistics is more than transportation — it's trust, solutions, and peace of mind. With a strong base in India and global partners, we specialize in project cargo, pet relocations, household moves, and international freight forwarding.

PROJECT CARGO SPOTLIGHT

Spedition India recently managed a complex international logistics project, coordinating mixed cargo, demonstrating expertise in precision logistics, special equipment handling, and multi-container transport across continents.

It started with a complex, multi-container brief.

Our team quickly mapped out the details and mobilized the right equipment: dry van, high cubes, flatracks, and an open top.

Cargo was received, inspected, and stuffed with care, ensuring special items were lashed and secured as per requirement.

Final checks were completed before containers moved to Nhava Sheva, aligned with the vessel schedule.

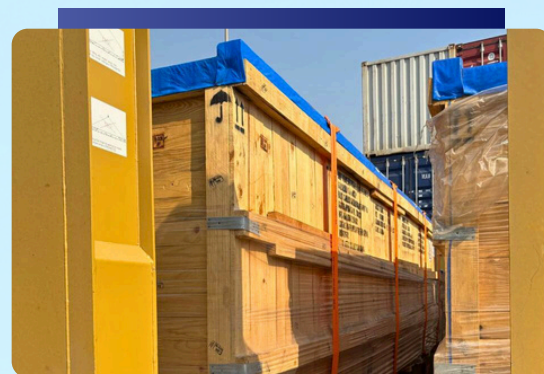

Swift customs clearance and proactive tracking ensured a smooth sail to Altamira, Mexico.

PROJECT DETAILS

The shipment consisted of **26 distinct cargo units**, distributed across a combination of standard and special equipment containers:
